

Name: _____

February 5

5-a-day

Higher

Find the size of angle y .

Expand and simplify

$$(y + 5)^2$$

The small jug holds 500ml of water.

How much does the larger jug hold?

Time, t (seconds)	Frequency
$120 \leq t < 150$	12
$150 \leq t < 180$	17
$180 \leq t < 210$	21

Calculate an estimate of the mean.

Simplify $\frac{x^2 - 9}{5x^2 + 14x - 3}$
