

Name: \_\_\_\_\_

April 2nd	5-a-day	Foundation
$A = 3w - 2y$ Work out the value of $A$ when $w = 5$ and $y = 6$		
	What is the probability of a 2? All sections are the same size.	
Expand $5(3w + 2)$	Expand and simplify $2(w + 3) + 3(w + 5)$	
Factorise $10w - 15y$		
Write 80 as a product of primes
