$1.50 = £1

A pair of trousers costs £70.

Work out the cost in dollars.

Paul travels from home to work, which is 80 miles away. It takes one and a half hours.

Paul stays at work for one hour.

He then travels home, but due to traffic, it takes two hours.

What was Paul’s speed on the journey to work?

Using the information above, complete the distance-time graph.

Calculate the area

Expand and simplify

$9(y + 3) - 3(2y + 5)$
