

Name: _____

May 19	5-a-day	Higher								
1 5 6 2 4 6 2 5 6 5		What is the relative frequency of a 6?								
Based on results above, how many sixes would be expected if the dice was rolled 100 times?										
		Find x								
Work out four thousand times fifteen million. Give your answer in standard form.										
<table><thead><tr><th>Height</th><th>Frequency</th></tr></thead><tbody><tr><td>$0 < h \leq 20$</td><td>30</td></tr><tr><td>$20 < h \leq 40$</td><td>50</td></tr><tr><td>$40 < h \leq 60$</td><td>10</td></tr></tbody></table> <p>Find the median, using linear interpolation</p>	Height	Frequency	$0 < h \leq 20$	30	$20 < h \leq 40$	50	$40 < h \leq 60$	10		
Height	Frequency									
$0 < h \leq 20$	30									
$20 < h \leq 40$	50									
$40 < h \leq 60$	10
