

Name: _____

July 11th	5-a-day	Numeracy
45 + 76	86 - 21	
Write out the next two multiples of 3. 3, 6, ____ ____		
12 8 16 3 19 36 Write down the number that is 50% of 38	Write down the number that is a factor of 40	
 <p>The diagram shows a right-angled triangle. One of the acute angles is labeled 55°. The other acute angle is labeled y. A small square at the vertex between these two angles indicates a right angle. The angle y is the angle adjacent to the 55° angle, forming a straight line with it.</p>	Calculate y	
Simplify $\frac{77x}{7}$
