

17th March	
Sketch $y = \frac{5}{x}$	 Corbettm0ths
Sketch $y = -\frac{5}{x}$	
$\sum_{r=21}^{30} (3 + 4r)$	
The first three terms in an arithmetic sequence are $x + 5, 10x - 17, 6x$ Find x and the 20th term	
The curve C with equation $y = f(x)$ passes through $(1, 8)$ and $f'(x) = 2(x + 4)(x + 1)$ Find $f(x)$
