

1st December

Corbettmaths

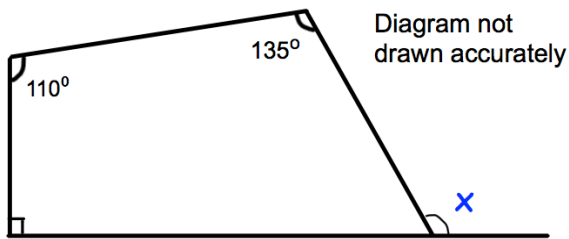

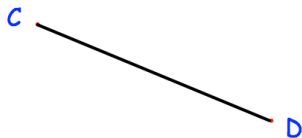

Given that $14.5 \times 34 = 493$

Write down the value of

14.5×17

Write down the value of

$49.3 \div 14.5$

Find x 

Scale: 1cm represents 100km

Use the diagram to calculate the actual distance from C to D.

$$\frac{3}{4} \times \frac{1}{5}$$

$$\frac{3}{4} + \frac{1}{5}$$

Kelly buys a 2 week holiday to California in March for £1800.

Jenny buys a 2 week holiday to California in July for \$4219.60

Given £1 = \$1.54

Find how much more Jenny pays for her holiday.
