A bag of apples weighs 5kg, correct to the nearest kilogram.

What is the greatest possible weight of four bags?

Find angle ABC

The area of parallelogram A is 28cm^2
Work out the area of parallelogram B.

Above are two similar parallelograms.

James is a student of a class of 16 students, 5 of which wear glasses.

1197 students attend the school.

Use this information to estimate how many students in the school wear glasses.

A different bag contains 4 red apples and 6 green apples. Three apples are taken from the bag, one at a time, with replacement.

What is the probability of three red apples?
