Find x Solve $2x + 1 = 13$

Joey thinks the answer to $16 + 4 \times 2$ is 40.
Albert thinks the answer to $16 + 4 \times 2$ is 24.

Who is correct?
Explain your answer.

Holly selects a sweet at random.

What is the probability of her selecting a green sweet?

Gareth adds his sweets to Holly's sweets.

There is now an equal chance of selecting a green, red or yellow sweet.

Write down what sweets Gareth may have had.
