4th January

Write these numbers in order of size. Start with the smallest number.

60%  \( \frac{1}{2} \)  0.3  \( \frac{3}{4} \)  0.4

Simplify \( 4x + 3y - 2x + 5y \)

If £1 is $1.50

Change £4 into dollars.

Change £100 into dollars.

Change $4.50 into pounds.

Change $30 into pounds.

The diagram below shows a shape made with centimetre cubes.

On the centimetre square grid, draw the front elevation.

On the centimetre square grid, draw the side elevation.
