Expand and simplify

$$(x - 7)^2$$

Make c the subject of

$$v = \pi c^2 h$$

Number of spins	Relative frequency of a green
100	0.12
200	0.17
300	0.21
400	0.23
500	0.22

How many greens were obtained after 300 spins?

Which number of spins gives the most reliable relative frequency?

Shown are four terms in a Fibonacci sequence

1 1 2 3

Write down the next four terms
