Solve $2(5 - 2x) = 5 + 6x$

Write 0.0000434 in standard form

Write 9800000 in standard form

Calculate the length of BC

The Earth and the Sun are
150000000km apart.

Write this number in standard form.

Convert 150000000km into metres.
Write the answer in standard form.

Solve these simultaneous equations

$$2x + 5y = 4$$

$$3x + 4y = 13$$
