Corbettmaths

Arrange these in order, starting with the smallest.

$$2^2 \quad \sqrt[3]{27} \quad 1^3 \quad \sqrt{25}$$

Expand $y(6 - 2y^2)$

Expand $4h(2h - 3)$

What is the bearing of Donhampton from Leek?

A helicopter is 25 miles from Castletown on a bearing of 200° .

Mark it's location on the map.

Factorise completely

$$10xy + 6x^2$$
