

25th March

Corbettmaths

$$3\frac{2}{5} \div 1\frac{1}{3}$$

Make a the subject of

$$c = a^2$$

Make w the subject of

$$y = 3x - w$$

Factorise  $x^2 + 17x + 60$ 

Solve

$$4x + 2y = 8$$

$$2x - 5y = 10$$

Find the equation of this line
