

7th March

Corbettmaths

Work out

$$4\frac{1}{3} - 3\frac{4}{9}$$

Give your answer as a fraction.

$c = 50$ when rounded to the nearest ten.

Write an inequality to show the interval in which the actual value for c lies.

$$y = \frac{1}{x}$$

Complete the table of values and draw a graph

x	0.5	1	2	3	4	5
y						

Evaluate

$$2^{-3}$$
