55% students in a school are boys.  
What percentage are girls?

There are 300 students in the school.  
How many boys are there?

the cube root of 64

The distance between two cities is 2898 miles.  
The plane journey took 6 hours.  
Calculate the average speed of the plane.

Two fair six-sided dice are rolled.  
The score is **difference** between the numbers on each dice.  
Complete the table to show all possible scores.

		Dice 1					
		1	2	3	4	5	6
Dice 2	1	0	1				
	2	1					
	3	2					
	4						
	5						
	6						

Find the probability of scoring a 2

Find the probability of scoring a number less than 3
