

21st September

Corbettmaths

In one week 800 people went to a swimming pool. 40% of them were men.

How many men went to the swimming pool?

A teacher has five cards.

He says:

“I am going to take a card at random.

It is certain that the card is over 20.

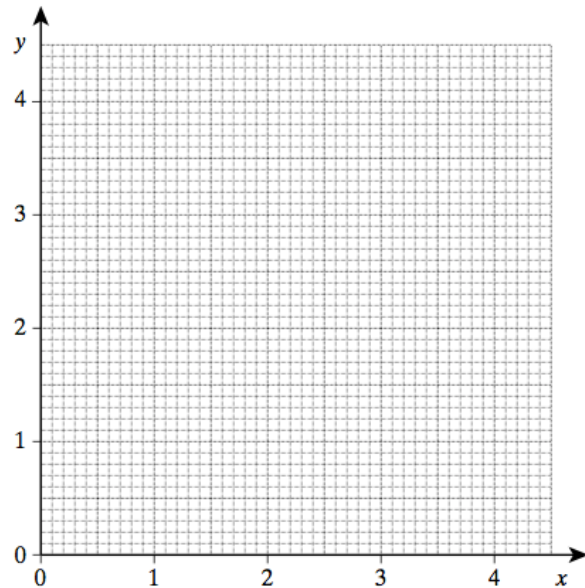

It is impossible that the card is odd.

The range of the numbers is 8.

Each card shows a different number.”

What could the numbers be?

On the grid, draw the graph of $x = 3$.

On the grid, draw the graph of $y = 1$.

Calculate the area of the circle
