Expand and simplify

$$(w + 5)(w - 6)$$

Factorise completely

$$4a^2 - 8a$$

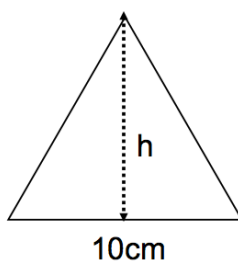

Write 0.00000092 in standard form.

Write 150×10^6 in standard form.

A circle has circumference 80cm.

Find the area.

Below is an equilateral triangle

Calculate the height of the triangle.

It takes 6 hours for 20 workers to seed 40 acres.
How long would it take 10 people to seed 90 acres?
