

<p><b>2nd December</b></p>  <p>CorbettmOths</p>	
<p>Solve the simultaneous equations</p> $\frac{1}{4}y = x \quad y = 4x$ $y = x^2 + 3 \quad 4x = x^2 + 3$ $x^2 - 4x + 3 = 0$	$x = 1 \quad y = 4 \quad (1, 4)$ $x = 3 \quad y = 12 \quad (3, 12)$
<p>The Venn diagram shows information about cars in a car park.  <math>\xi = 73</math> cars in the car park                  R = red cards                  N = cars under 4 years old</p> <p>A car is chosen at random.                  Given it is under 4 years old, find the probability that it is Red.</p> $x^2 - 10x + x + x - 3 + 11 = 73$ $x^2 - 8x + 8 = 73$ $x^2 - 8x - 65 = 0$ $(x - 13)(x + 5) = 0$ $x = 13 \quad \text{or} \quad x = -5$ <p style="text-align: center;">✓ <span style="margin-left: 100px;">x</span></p>	<div style="border: 1px solid black; padding: 10px; width: fit-content; margin: auto;"> <math>\xi</math>  </div> $\frac{13}{23}$
<p>Find the first 3 terms of the sequence <math>n^2 - 4n + 25</math></p> $22, 21, 22, 25, 30$	<p>Prove every term in the sequence <math>n^2 - 4n + 25</math> is positive.</p> $(n-2)^2 - 4 + 25$ $(n-2)^2 + 21$ <p style="text-align: center;">min is 0</p> <p><math>\therefore</math> min value of term in the sequence is 21</p>
<p>A solid sphere is made from a material of density <math>5.4\text{g/cm}^3</math> to the nearest 1 decimal place.                  The mass of the sphere is <math>3000\text{kg}</math> to 2 significant figures.                  Find the difference between the smallest and largest possible lengths for the radius.</p> <p style="text-align: center;"><math>\frac{m}{V}</math></p>	$\text{Max } V = \frac{3050000}{5.35}$ $= 570093.4579 \text{ cm}^3$ $\therefore r = 51.44 \text{ cm}$ $\text{Min } V = \frac{2950000}{5.45}$ $= 541284.4037 \text{ cm}^3$ <div style="border: 1px solid black; padding: 5px; display: inline-block; margin-top: 10px;"> <math>0.88 \text{ cm}</math> </div>

$$r = \frac{m}{V}$$

$$\therefore r = 50.56 \text{ cm}$$

$$\text{Min } V = \frac{\text{Min } m}{\text{Max } \rho}$$

$$\text{Max } V = \frac{\text{Max } m}{\text{min } \rho}$$
