

2nd February

Corbettmaths

Match each statement to the correct expression.

Bob has £1.65
Jill has 75p

How much money must Bob give Jill so that they end up with the same amount?

$$1.65 - 0.75 = 0.90$$

$$0.90 \div 2 = 0.45$$

45p

Three whole numbers have a mean of 20. None of the numbers is equal to 20.

$$20 \times 3 = 60$$

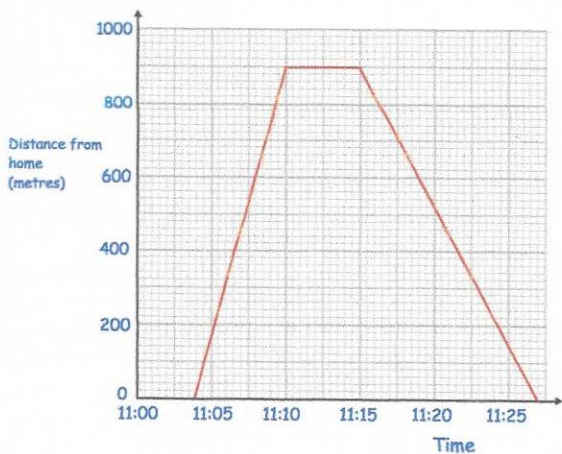

Write down three possible numbers.

Any three whole numbers that add up to 60 (no 20's!)

$$10 + 15 + 35 = 60$$

$$60 \div 3 = 20$$

10, 15, 35
19, 18, 23
5, 5, 50 etc

How long did Rebecca stop for?

5 minutes

How far did Rebecca travel in total?

$$900 \times 2 =$$

$$1800m$$

or 1.8km
