Shown is a fair spinner

Mark the scale with the probability of landing on yellow.

Reflect the green triangle in the x-axis

Reflect the green triangle in the line $x = 1$

There are 8 bags of sweets.

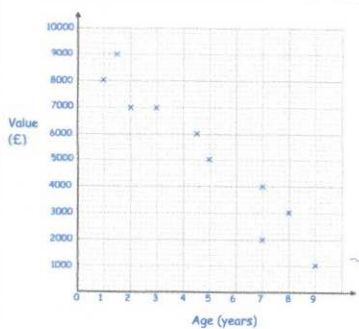

5 bags each have 18 sweets. 90
 The other 3 bags have an equal number of sweets.

$$90 \div 3 = 30$$

Altogether there are 150 sweets

How many sweets are there in the other 3 bags?

30

What type of correlation is shown?

Negative
