Corbettmaths

The population of a country is

$$9.08 \times 10^5$$

Write the population of the country as an ordinary number.

$$908000$$

Find x

$$6x + 24 = 360$$

$$6x = 336$$

$$x = 56^\circ$$

Each flowerpot is a cylinder with radius 7cm and height 20cm.

Carl has 50 litres of soil.

How many flowerpots can be filled?

$$\text{volume of 1 flowerpot} = 3.07876 \text{ L}$$

$$50 \div 3.07876$$

$$16.24 \dots$$

$$\underline{\underline{16}}$$

Carl is filling flowerpots with soil.

$$\begin{aligned} V &= \pi r^2 h \\ &= \pi \times 7^2 \times 20 \\ &= 3078.76 \text{ cm}^3 \end{aligned}$$

$$2^{-3} \div 3^{-2}$$

$$\frac{1}{2^3} \div \frac{1}{3^2}$$

$$\frac{1}{8} \div \frac{1}{9}$$

$$\frac{1}{8} \times \frac{9}{1} = \frac{9}{8}$$

$$\text{or } 1\frac{1}{8}$$
