

<b>21st February</b>		 Corbettmaths
Three fair six sided dice are rolled.		
Work out the probability of three even numbers.		
Work out the value of x		
Simplify $\frac{x^2 + 6x + 9}{x^2 - 2x - 15}$		
		Helicopter A traveled 15km on a bearing of $060^\circ$ Helicopter B traveled 20km on a bearing of $150^\circ$ Calculate the distance between A and B.
