

10th February	Corbettmaths 
Prove that the product of two odd numbers is always odd.	
	Sketch $y = -f(x)$ 
Sketch $y = f(-x)$ 	
Find the 20th term in the quadratic sequence 5 6 9 14 21	
Find x Give your answers to 2 decimal places	$\frac{7}{x+3} + \frac{1}{x-1} = 1$
