

14th February	Corbettmaths 
$\frac{4x^2 - 25}{6x^2 - 11x - 10}$	Simplify fully
Find the value of x $2x \times 4x+3 = 16$	
	Find the equation of Line 2
Line 1 has equation $y = \frac{3}{2}x - 24$	Are the lines perpendicular?
A triangle has sides of 8cm, 9cm and 13cm.	
Calculate the difference between the smallest and largest angles.
