

27th January

Estimate $\sqrt{100}$ 

Find x

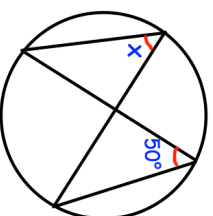

The cost of a circular table is directly proportional to the square of the radius. A circular table with a radius of 40cm cost £50.

What is the cost of a circular table with a radius of 60cm?

<p>A</p>	<p>B</p>
<p>C</p>	<p>D</p>

Identify the two congruent triangles and explain your answer.
