

8th June	Corbettmaths
Find the equation of the line passing through (0, 5) and (2, 11)	
Hannah is baking two cakes. One cake needs $1\frac{1}{3}$ cups of milk. Hannah has $1\frac{1}{4}$ cups of milk. How much more milk does Hannah need?	
Solve these simultaneous equations $3x - 3y = 9$ $2x + y = 12$	
	Three identical regular pentagons are joined as shown above. Work out the size of angle y .
Calculate length y
