

5th June		Corbettmaths														
Write 52% as a decimal	Write 0.55 as a fraction in its simplest form															
$\frac{5}{9} \times 27$	How much more money is in Bag 2 than Bag 1?															
<p>Bag 1  Bag 2 </p> <p>Bag 1 contains £9.20 in 5p coins. Bag 2 contains twice as many coins as Bag 1. If Bag 2 contains only 50p coins.</p>																
<p>Complete the table</p> <table border="1"> <thead> <tr> <th></th> <th>Square</th> <th>Rhombus</th> <th>Trapezium</th> </tr> </thead> <tbody> <tr> <td>Number of pairs of parallel sides</td> <td>2</td> <td></td> <td></td> </tr> <tr> <td>Diagonals always equal in length</td> <td></td> <td></td> <td>No</td> </tr> </tbody> </table>				Square	Rhombus	Trapezium	Number of pairs of parallel sides	2			Diagonals always equal in length			No		
	Square	Rhombus	Trapezium													
Number of pairs of parallel sides	2															
Diagonals always equal in length			No													
<p>Susan has some beads in a bag. 5 of the beads are orange. 3 of the beads are purple. The rest of the beads are pink. Susan takes a bead from the bag at random. The probability that she takes a pink bead is $\frac{3}{5}$</p>	How many pink beads are in the bag before Susan takes a bead?
