

12th June	 Corbettmaths
Which of these values cannot be the cosine of an angle? -1 3 0.7 -0.04	
Shown below is the curve with equation $y = f(x)$. The curve passes through the points $(-4, 0)$, $(-1, 0)$ and $(0, 5)$	Sketch $y = f(x - 1)$ 
The heights of some sunflowers are represented in a histogram. 	Sketch $y = -f(x)$ 
Find an estimate of the interquartile range.
