

10th June	Corbettmaths 
Simplify $\sqrt{98}$	
$(x + 4)^2 \equiv x^2 + 8x + 16$ $(x + 4)^2$ $(x + 4)^2 < 10$ $(x + 4)^2 = x - 3$	Circle the identity
	Find x and y
A cube has the same volume as the cone. Calculate the side length of the cube.	
Evaluate $\frac{3}{4}$ 10000
