

21st June Arrange in descending order 738000 9.4×10^3 20×5^8	 Corbettmaths
	Sophie selects a card at random, then replaces it. She then selects another. What is the probability she selects two black cards?
	Shown is a square-based pyramid with volume 270cm^3 Find the length of the side marked x .
Simplify $\sqrt{80}$	
	Find y
