

Name: _____

5-a-day

Foundation Plus

3rd March

Solve the simultaneous equations

$$2x + y = 7$$
$$3x - y = 8$$

Factorise $x^2 - x - 12$

Write 5.2×10^{-4}
as an ordinary number

Find the nth term of
90 80 70 60 ...

Find the 100th term.

Solve:
 $3(4x - 9) = 2x + 30$
