

12th March	Corbettmaths
<p>Find an expression, in terms of <math>n</math>, for the <math>n</math>th term of the quadratic sequence</p> <p>5    8    15    26</p>	
<p>In a tin there are three different types of biscuit.</p> <p>4 chocolate 3 digestive 2 shortbread</p>	<p>Tina takes two biscuits at random. Work out the probability that she takes two different types of biscuit.</p>
	<p>How many people are represented by this histogram?</p> <p>Estimate the median age.</p>
	<p>Shown is the curve with equation <math>y = f(x)</math>. The coordinates of the minimum point of the curve are (5, 2).</p> <p>Write down the coordinates of the minimum point of the curve with equation <math>y = f(x + 6) - 4</math></p>
