

3rd March		Corbettmaths 
<p>Shown is the first 10 seconds of the journey of a car</p> 	<p>Work out an estimate for the distance the car travels in these 10 seconds</p>	<p>Is your answer an underestimate or an overestimate? Explain your answer.</p>
	<p>Prove the sum of four consecutive odd numbers is always a multiple of 8.</p>	
<p>There are 20 passengers on a flight from London to Paris. 60% of the passengers are from England. The rest are from France. Four passengers are chosen at random to complete a survey.</p>		
<p>Find where the tangent to the circle $x^2 + y^2 = 20$ at the point $(4, -2)$ meets the y-axis.</p>
