

15th May		Corbettmaths
<p>The diagram shows the circle $x^2 + y^2 = 17$</p> <p>P lies on the circle and has x-coordinate 1.</p> <p>The tangent at P intersects the x-axis at R.</p> <p>Work out the coordinates of R</p>		
	<p>Find the volume of liquid in the container</p>	
	<p>Prove that the angle in a semi-circle is always 90°</p>	
	<p>All values are correct to 2 significant figures. Calculate the upper bound of AC.</p>
