

9th May	Corbettmaths												
Solve $x^2 + 2x - 15 < 0$													
$f(x) = 7x - 2$	Find $f^{-1}x$												
A bag contains 4 red sweets and 5 green sweets. Kelly removes 3 sweets, one at a time, without replacement. Find the probability that she chooses 3 sweets of the same colour.													
Calculate an estimate of the median	<table border="1"> <thead> <tr> <th>Time taken</th> <th>Frequency</th> </tr> </thead> <tbody> <tr> <td>$0 < t \leq 10$</td> <td>135</td> </tr> <tr> <td>$10 < t \leq 20$</td> <td>244</td> </tr> <tr> <td>$20 < t \leq 30$</td> <td>555</td> </tr> <tr> <td>$30 < t \leq 50$</td> <td>106</td> </tr> <tr> <td>$50 < t \leq 100$</td> <td>20</td> </tr> </tbody> </table>	Time taken	Frequency	$0 < t \leq 10$	135	$10 < t \leq 20$	244	$20 < t \leq 30$	555	$30 < t \leq 50$	106	$50 < t \leq 100$	20
Time taken	Frequency												
$0 < t \leq 10$	135												
$10 < t \leq 20$	244												
$20 < t \leq 30$	555												
$30 < t \leq 50$	106												
$50 < t \leq 100$	20												
Find the shortest possible distance between the line $y = 4x + 5$ and the origin.
