

14th May		Corbettmaths
	Write down the upper quartile	
	Calculate angle x	
<p>Expand and simplify</p> $(2x - 1)^3$		
	<p>Shown is a triangle with measurements given to 1 significant figure.</p> <p>Calculate the lower bound for the area</p>	
<p>Work out</p> $\frac{2\pi^3}{5} \div \frac{\pi}{3}$		
simplify your answer
