

29th November		Corbettmaths														
Complete the table for the graph $y = 4 - x^2$	<table border="1"> <thead> <tr> <th>x</th> <th>-3</th> <th>-2</th> <th>-1</th> <th>0</th> <th>1</th> <th>2</th> </tr> </thead> <tbody> <tr> <th>y</th> <td>-5</td> <td>3</td> <td>3</td> <td>4</td> <td>3</td> <td>3</td> </tr> </tbody> </table>	x	-3	-2	-1	0	1	2	y	-5	3	3	4	3	3	
x	-3	-2	-1	0	1	2										
y	-5	3	3	4	3	3										
Hence draw the graph on the grid.																
Work out	$\frac{\pi}{3} - \frac{\pi}{7}$															
Give your answer in terms of π																
James says $(a + b)^2 = a^2 + b^2$ Is he correct?																
The ratio of red to green sweets in a bag is 7:2																
If r is the number of red sweets and g is the number of green sweets in the bag, work out a formula for r in terms of g .
