

Name: \_\_\_\_\_

5-a-day

Higher Plus

15th November

Show

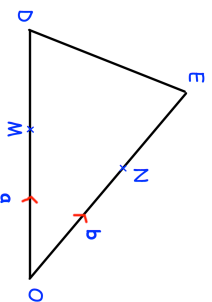

$$x^4 - 7x^3 = 6$$

has a solution between 7 and 8

Prove that the product of two consecutive even numbers is a multiple of 4.

$$\text{Solve } 3x^2 - 19x - 14 < 0$$

Show DE is parallel to MN

ODE is a triangle  
M is the midpoint of OD  
N is the midpoint of OE

$$\vec{OM} = a$$

$$\vec{ON} = b$$
