

<b>11th November</b>  Corbettmaths	
	Enlarge the triangle by scale factor $-\frac{1}{2}$ , using centre of enlargement (0, 0)
Simplify $\frac{4x}{5y} \times \frac{3y}{8x}$	Simplify $\frac{x}{y} \times \frac{x}{y}$
	
Lowest: 20 Lower Quartile: 50 Median: 65 Upper Quartile: 72 Highest: 108	Calculate the range.  Calculate the interquartile range.
Draw the box plot above.
