

20th November		Corbettmaths 
<p>Graph A </p> <p>Graph B </p> <p>Graph C </p> <p>Graph D </p>	<p>Match each graph to the correct equation</p> <p><math>y = x^2</math> is graph <b>A</b></p> <p><math>y = x^3</math> is graph .....</p> <p><math>y = 2^x</math> is graph .....</p> <p><math>y = \frac{1}{x}</math> is graph .....</p>	
<p>Estimate <math>38 \frac{3}{2}</math></p>		
<p>Simplify fully</p> $\frac{x^2 + 8x}{x^2 + 10x + 16}$		
<p>Solve, giving your answers to one decimal place.</p> $x^2 + 2x - 4 = 0$
