

Name: _____

5-a-day

Higher

| 17th October | | Corbettmaths |
|--|---|--------------|
| Simplify $\frac{x^2 + 3x}{3x^2}$ | | |
| Work out $16\frac{3}{2}$ | Evaluate $(\frac{16}{25})^{\frac{1}{2}}$ | |
| The sum of the interior angles in a polygon is 7380° . Calculate the number of sides the polygon has. | | |
| Expand and simplify $(2x + 1)(x + 3)(x + 1)$ | | |
| Matthew is playing darts. The probability he hits a bulls-eye is 0.4 Matthew throws two darts. Find the probability Matthew does not hit the bulls-eye with either dart | | |
