

27th August Write as a power of 2 $\sqrt[4]{32}$	 Corbettmaths
	Find the volume of liquid in the container
Find the coordinates of the minimum point of the curve with equation $y = x^2 - 6x + 7$	
Express in the form $av^7 + b$ $\frac{\sqrt{7} + 1}{\sqrt{7} - 3}$	
$f(x) = x + 90$ $g(x) = \cos x$ Draw $y = gf(x)$
