<b>15th July</b>		 Corbettmaths
A light flashes every 42 seconds. A buzzer buzzes every 2 minutes. They both operate, how long until they both operate again?		
Work out $\frac{(y - 2)^2}{4y}$ if $y = 3.2$		
$1\frac{4}{7} \div 1\frac{1}{4}$		
Factorise $x^2 + 11x + 18$	Factorise $x^2 - 16$	
Solve the inequality $5x + 11 < 2x + 27$
