Foundation

2nd July		Corbettmaths
	<p>Does a kite have two lines of symmetry?</p> <p>Do the diagonals cross at right angles?</p>	
Simplify	Simplify	
$8w + w + 3w - 4w$	$8a + 5c - 3a - 7c$	
Paul and Donna share 140 sweets in the ratio 2:5.		
How many sweets does Donna get?		
Solve		
$\frac{x + 3}{4} = 8$		
<p>An airplane has economy and first class seating.</p> <p>There are <math>s</math> seats in each row in economy.</p> <p>There are <math>t</math> seats in each row in first class.</p> <p>There are 9 rows in first class and 24 rows in economy.</p>	<p>Write down an expression, in terms of <math>s</math> and <math>t</math>, for the number of seats on the airplane.</p>
