

19th July		Corbettmaths
<p>Here is a sketch of $y = 9 - x^2$</p> <p>The graph is used to model the cross section of a tunnel. Calculate an estimate of the area under the graph.</p>	<p>Corbettmaths</p> <p>Here is a sketch of $y = 9 - x^2$</p> <p>The graph is used to model the cross section of a tunnel. Calculate an estimate of the area under the graph.</p>	
<p>Solve the simultaneous equations</p> $y = 9x^2 + 11x + 3$ $5x - y + 2 = 0$		
<p>Simplify fully</p> $\frac{3x^2 + 20x - 7}{16x^2 - 1} \div \frac{x + 7}{4x + 1}$		
<p>The two sectors have the same area. Find x</p>
