

9th July

Corbettmaths

Number of hours (h)	Frequency
0<h≤2	20
2<h≤4	32
4<h≤6	48
6<h≤8	120
8<h≤10	24
10<h≤12	16

Draw a cumulative frequency diagram.

Find x, y and z

M is directly proportional to the square of A.

When M = 200, A = 2.

Find M when A = 4.

Simplify

$$\frac{d \frac{1}{5} \times d \frac{2}{3}}{d \frac{3}{5}}$$
