How many points do they have?
	<b>Wins</b>	<b>Draws</b>	<b>Losses</b>																			
Sunderland City	1	5	3																			
Manchester Rovers	2	1	6																			
Liverpool United	3	0	6																			
London Town	0	9	0																			
There are two bags of sweets, bag 1 and bag 2. In total there are 40 sweets in the bags.  12 sweets are moved from bag 1 to bag 2. There is now an equal number of sweets in each bag.	How many sweets were in bag 2 at the start?																					
<p style="text-align: center;">N</p> <p style="text-align: center;">↓ X</p> <p style="text-align: center;">School</p> <p style="text-align: center;">N</p> <p style="text-align: center;">↓ X</p> <p style="text-align: center;">Shop</p>	The scale of the map is 1cm = 100 metres.  Work out the real distance between the school and the shop. Give your answer in metres.	What is the bearing of the shop from the school?																				
<p>Volume = <math>120\text{cm}^3</math></p> 	This cuboid has a volume of $120\text{cm}^3$ Work out a possible value for its surface area.
