

5th November		Corbettmaths									
Match each decimal and fraction.		Decimal	Fraction								
		0.325	$\frac{2}{5}$								
		0.4	$\frac{7}{20}$								
		0.3333...	$\frac{13}{40}$								
		0.35	$\frac{1}{3}$								
Solve $\frac{x+6}{8} = 4$											
<p>Male</p> <table border="1"> <tr> <td>French</td> <td>14</td> <td>German</td> <td></td> </tr> <tr> <td>Female</td> <td></td> <td></td> <td>8</td> </tr> </table>		French	14	German		Female			8	<p>Twice as many girls study German that boys.</p> <p>There are 40 students altogether.</p> <p>Find the missing numbers.</p>	
French	14	German									
Female			8								
<p>Sam and James win £500 in a competition.</p> <p>They share the money in the ratio 3:7.</p> <p>Sam gives 35% of the money he wins to his brother, Harry.</p> <p>How much money does Harry receive?</p>											
Expand	$2w(3w^2 - 5)$	Expand	$y^2(8 - 2y)$
