

12th September		Corbettmaths
Expand and simplify $(w + 5)(w - 6)$	Factorise completely $4a^2 - 8a$	
Write 0.00000092 in standard form.	Write 150×10^6 in standard form.	
A circle has circumference 80cm. Find the area.		
Below is an equilateral triangle	Calculate the height of the triangle.	
		
It takes 6 hours for 20 workers to seed 40 acres. How long would it take 10 people to seed 90 acres?
